- The Board, after careful scrutiny of the application and verification report of the Regional Officer, hereby issues **CONSENT FOR ESTABLISHMENT FOR EXPANSION** to the project under Section 25 of Water (Prevention & Control of Pollution) Act 1974 and Section 21 of Air (Prevention & Control of Pollution) Act, 1981 and the rules made there under. **This order is issued to manufacture the products as mentioned at para (1) only.**
- This Consent Order now issued is subject to the conditions mentioned in the Annexure.

6. This order is issued from pollution control point of view only. Zoning and other regulations are not considered.
7. **This order is valid for a period of Seven years from the date of issue.**

**Encl:** Annexure.

**MEMBER SECRETARY**

**To**

**M/s Granules India Ltd., Unit – V (expn),  
(M/s. GIL Life Sciences Private Limited,) Plot no. 30, JN Pharmacy,  
Parwada, Visakhapatnam.  
venkat.karimi@granulesindia.com  
muralidharmananchiganti@granulesindia.com**

**Copy to:** 1. The JCEE, Z.O., Visakhapatnam for information and necessary action.  
2. The E.E., R.O, Visakhapatnam for information and necessary action.

### Annexure

1. The proponent shall obtain Consent for Operation (CFO) from APPCB, as required Under Sec.25/26 of the Water (P&C of P) Act, 1974 and under sec. 21/22 of the Air (P&C of P) Act, 1981, before commencement of the trial runs.
2. The applicant shall provide separate energy meters for Effluent Treatment Plant (ETP) and Air pollution Control equipments to record energy consumed. An alternative electric power source sufficient to operate all pollution control systems shall be provided.
3. The industry shall construct separate storm water drains and provide rain water harvesting structures. No effluents shall be discharged in to the storm water drains.

### Water:

1. The source of water is JNPC supply and the maximum permitted water consumption is as following:

| S. No. | Purpose                                                                                  | Quantity as per CFE dt. 06.07.016 (KLD) | Quantity after expansion (KLD) |
|--------|------------------------------------------------------------------------------------------|-----------------------------------------|--------------------------------|
| 1.     | Industrial cooling and boiler feed                                                       | 140.00                                  | 184.00                         |
| 2.     | Domestic & gardening purposes                                                            | 55.00                                   | 70.00                          |
| 3.     | Processing, whereby water gets polluted and pollutants are easily bio- degradable        | ----                                    | ----                           |
| 4.     | Processing, whereby water gets polluted and the pollutants are not easily bio-degradable | 46.70                                   | 80.60                          |
|        | <b>Total</b>                                                                             | <b>241.70</b>                           | <b>334.60</b>                  |

Separate meters with necessary pipe-line shall be provided for assessing the quantity of water used for each of the purposes mentioned above.

2. The maximum waste water generation shall not exceed the following:

| Sl. No. | Effluent                        | Quantity as per CFE order dt. 06.07.016 (KLD) |              |               | Quantity after expansion (KLD) |              |               |

### Treatment & disposal:

| Source               | Treatment                     | Mode of final disposal                                                           |
|----------------------|-------------------------------|----------------------------------------------------------------------------------|
| HTDS                 | Pretreatment (Neutralization) | To M/s. Ramky Pharmacy for forced evaporation.                                   |
| LTDS                 | Pretreatment (Neutralization) | To CETP of M/s. Ramky Pharmacy for further treatment and disposal                |
| Domestic waste water | ---                           | The overflow of the Septic tank shall be sent to the CETP for further treatment. |

3. Effluents shall not be discharged on land or into any water bodies or aquifers under any circumstances.

4. The industry shall install online real time monitoring system along with web camera facilities as per the directions of CPCB. The industry shall connect them to APPCB / CPCB websites as per CPCB directions.
5. Floor washing shall be admitted into the effluent collection system only and shall not be allowed to find their way in storm drains or open areas. All pipe valves, sewers, drains shall be leak proof.

**Air:**

6. The Air pollution Control equipment shall be maintained properly to comply with the following for controlling air pollution after expansion:

**Consented as per CFE order dt. 06.07.016:**

| Sl.No | Details of Stack                | Stack 1                                         | Stack 2             |
|-------|---------------------------------|-------------------------------------------------|---------------------|
| a)    | Attached to                     | Coal Fired Boiler                               | D.G. Set            |
| b)    | Capacity                        | 4.0 TPH                                         | 1 X 1000 KVA        |
| c)    | Name of the Fuel                | Coal                                            | HSD                 |
| d)    | Stack height above ground (m.)  | 30 m                                            | 4 m                 |
| e)    | Air Pollution Control Equipment | Multi Cyclone Separators followed by Bag filter | Acoustic enclosures |

**After expansion:**

| Sl.No | Details of Stack                | Stack 1             | Stack 2             |
|-------|---------------------------------|---------------------|---------------------|
| a)    | Attached to                     | Boiler              | D.G. Set            |
| b)    | Capacity                        | 4.0 TPH             | 1 X 1000 KVA        |
| c)    | Name of the Fuel                | <b>Furnace Oil*</b> | HSD                 |
| d)    | Stack height above ground (m.)  | 36 m                | 4 m                 |
| e)    | Air Pollution Control Equipment | ---                 | Acoustic enclosures |

\*Fuel of the boiler is changed from coal to Furnace oil.

7. A sampling port with removable dummy of not less than 15 cm diameter shall be provided in the stack at a distance of 8 times the diameter of the stack from the nearest constraint such as bends etc. A platform with suitable ladder shall be provided below 1 meter of sampling port to accommodate three persons with instruments. A 15 AMP 250 V plug point shall be provided on the platform.
8. The industry shall provide the monitoring system to all the stacks / vents in the plant. Regular monitoring shall be carried out and report shall be submitted to the Regional officer.
9. The industry shall provide multi-stage scrubbers to the process vents to control the process emissions. The industry shall provide online pH measuring facility with auto recording system to the scrubbers provided to treat the process emissions.
10. The industry shall provide VOC monitoring system with auto recording facility.
11. The industry shall implement adequate measures to control all fugitive emissions from the plant.
12. The proponent shall ensure compliance of the National Ambient Air quality standards notified by MoEF, GoI vide notification No. GSR. 826 (E), dated. 16.11.2009 during construction and regular operational phase of the project at the periphery.

The generator shall be installed in a closed area with a silencer and suitable noise absorption systems. The ambient noise level shall not exceed 75 dB(A) during day time and 70 dB(A) during night time.

13. The proponent shall not use or generate odour causing substances or Mercaptans and cause odour nuisance in the surroundings.

14. The industry shall send the used / spent solvents to the recyclers (or) process them at their own solvent recovery facility within the premises.
15. The evaporation losses in solvents shall be controlled by taking the following measures:
  - i. Chilled brine circulation shall be carried out to effectively reduce the solvent losses into the atmosphere.
  - ii. Transfer of solvents shall be done by using pumps instead of manual handling.
  - iii. Closed centrifuges shall be used to reduce solvent losses.
  - iv. All the solvent storage tanks shall be connected with vent condensers to prevent solvent vapours.
  - v. The reactor vents shall be connected with primary & secondary condensers to prevent escaping of solvent vapour emissions into atmosphere.

**Solid Waste:**

16. The industry shall comply with the following for disposal of Solid wastes:

| S. No | Description                                                              | As per CFE dt. 06.07.016 | After change of product mix | Remarks                                                             |
